

HollisterStier
Allergy

□ ITEM NO. 6691, 6692, 6720

WARNING Important Safety Information

(See full prescribing information for complete boxed warning.)

This product is intended for use only by licensed medical personnel experienced in administering allergenic extracts and trained to provide immediate emergency treatment in the event of a life-threatening reaction. Allergenic extracts may potentially elicit a severe life-threatening systemic reaction, rarely resulting in death. Therefore, emergency measures and personnel trained in their use should be available immediately in the event of such a reaction. Patients should be instructed to recognize adverse reaction symptoms and cautioned to contact the physician's office if symptoms occur. Standardized glycerinated extracts may be more potent than regular extracts and therefore, are not directly interchangeable with non-standardized extracts, or other manufacturers' products. This product should never be injected intravenously. Refer to the package insert for full prescribing information.

MITE EXTRACTS

Two distinct strengths and a variety of vial sizes let you choose what best fits the needs of your practice...and your patients.

ITEM NO.	DESCRIPTION	CONCENTRATION
6691	Standardized 50/50 Mite Mix, <i>D. pteronyssinus</i> and <i>D. farinae</i>	5,000 AU/mL (each species) or 15,000 AU/mL (each species)
6692	Standardized Mite, <i>D. pteronyssinus</i>	10,000 AU/mL or 30,000 AU/mL
6720	Standardized Mite, <i>D. farinae</i>	10,000 AU/mL or 30,000 AU/mL

HollisterStier grows mites in our own facilities according to our exacting standards, allowing us to control the product at every step of the process. Our manufacturing plant is regulated by both CBER and CDER.

Two Strengths. Maximum Flexibility.

- Effective diagnosis and treatment mean you reach and benefit more patients. Studies have shown that puncture skin testing with *D. farinae* at 30,000 AU/mL identified more than twice as many mite sensitive patients when compared to 10,000 AU/mL.¹ We offer both to give you more options.
- Available in 10,000 AU/mL and 30,000 AU/mL to help you meet immunotherapy guidelines.
- Also available in a variety of vial sizes, meaning you can match both strength and size to best meet your needs.
- Like all of our glycerinated antigens, our mite doesn't contain phenol... which can denature the proteins in allergenic extracts.²

QUALITY. PURITY. RELIABILITY.
